

SUMMARY

I am an enthusiastic, analytical individual, prioritizing meticulous planning. With exceptional creativity and communication, I'm an energetic team player seeking challenges. Combining my enthusiasm for technology with a keen desire for continuous learning and skill development

EDUCATION

Jain College of Engineering Belagavi

Bachelor of Engineering
2018– 2022

SKILLS

- Python(NumPy, Pandas, Scikit-learn)
- SQL
- Power bi
- Data Visualization
- Excel
- Tableau
- R
- Data Modeling
- Google sheet
- Java
- GIT

CERTIFICATIONS

- Certified Java Full Stack course from Kodnest
- Certified Data Analyst course from cisco
- Certified AWS Course from LinkedIn Services

PROFESSIONAL EXPERIENCE

Data Analyst and Networking

Velankani Software private limited | 2023– 2024

- Used SQL (joins, filters, aggregations) to extract, manipulate, and analyze large datasets to support business intelligence and reporting needs.
- Developed and maintained Excel-based dashboards and reports using Pivot Tables, VLOOKUP, charts, and conditional formatting.
- Created visualizations and dashboards using Power BI to track KPIs and monitor performance metrics.
- Good understanding of data storage solutions, especially Data Lake and its data ingestion, storage, and retrieval processes.
- Worked independently and within a team to complete data projects, meet deadlines, and contribute to strategic decision-making.

Innobytes Technologies(Internship)

Remote. | 2024 July - 2024 Aug

- Built a dynamic quiz application using Java, incorporating real-time feedback mechanisms and scoring systems.
- Participated in developing front-end interfaces using HTML, CSS, and JavaScript to enhance user engagement.
- Collaborated on AWS-based deployments, ensuring scalable and secure application hosting.
- Designed SQL queries to validate data integrity during ETL processes and collaborated with developers to resolve discrepancies.

Projects

Data Analysis Dashboard

- Created an interactive dashboard using Power BI to visualize sales data, enabling real-time decision-making for stakeholders.
- Automated data updates using Python scripts, ensuring accurate and up-to-date insights.
